

RS232 isolate long distance communication converter

Introduction:

The H232A is converter long distance RS-232 signal with isolation and anti-jamming. It is used in pairs and no need external power, full-duplex working.

Features:

- 15Kv static protecting and 600W/ms lightning protecting
- Particular protecting circuit for the serial port, plus-and-play supported;
- Particular technique of serial port power getting of 95% high efficiency;
- TX,RX,GND 3 lines signals isolation, current loop transmission
- Particular protecting circuit for the serial port
- Industry level design, excellent import element chosen,

specification

Power Supply	Port powered, no need external power supply
Working Current	<10mA
Baud Rate	300~28,800bps
Communication distance	Max. 3km
Isolation voltage	2500V
Protect voltage	7~8V
Protect capability	600W/ms
Static protect voltage	15KV
Working temperature	-40℃~85℃
Weight	36g(Include the terminal block)
Dimension	87mm×33mm×17mm(Include the terminal block)
