

## RS-232 Isolator

The H232B achieves the isolation of RS-232 TX, RX, GND 3wires signals. It is port-powered that no need external power supply. It's also plus-and-play supported.

Standard DB9 male and female connector

Special port-powered technique, no need external power supply

TX,RX,GND 3wires signals isolation

Sheer transfers and baud rate auto-fitting, no need to change user's protocol

15Kv static protecting and 600W/ms lightning protecting

Protecting the device from loop voltage, surge

Power Supply	Port powered. No need external power supply.
Working Current	<10mA
Baud Rate	300~38,400bps
Communication distance	0~10m
Isolation voltage	2500V
Protect voltage	7~8V
Protect capability	600W/ms
Static protect voltage	15KV
Working temperature	-40℃~85℃
Weight	24g (not include the terminal block)
Dimension	63mm×33mm×17mm
